Pickguards

The shape model taken from original Fender Japan guitars and basses.
The control section is shielded with aluminum on the back side.
Counterbored for screw holes.

Brand new items with vinyl protective pull of film.
Pickups and electronics are not included.
Pot holes are fit to both metric scale and inch scale.
1 Ply (including Mirror and Transparent): Non-Taper Rolling
3 Ply (including Pearl and Tortoiseshell): Taper Rolling

Fender Stratocaster

There are 3 types of pickguards for Stratocaster, witch are '57, '62, and '72.
57 has 8 screw holes, '62 and '72 have 11 screw holes,
however '62 and '72 have holes on different points.

Stratocaster '57

pickup capacity: 70.8mm x 18.2mm
pickup screw interval: 77mm
switch screw interval: 41mm
pot hole diameter: 9.5mm
Thickness:
1 Ply & Transparent - 2.2mm
3 Ply - 2.6mm
Pearl/Tortiseshell - 2.4mm

Pots&Switches

Pots

Curves:

(A) Audio Taper

(B) Liner

Bass Size:

Full Quarter - 24mm

Dime&Push-Pull - 16mm

Bottom Thread Diameter:

Full Quarter&Pussh-Pull - 8mm (5/16" hole is recommended, however it works with 3/8" hole)

Dime - 7mm (5/16" hole is recommended, however it works with 3/8" hole)

Top Thread Diameter: 6mm (Our pot knobs just fit)

Resistances & Curves:

Use 250K for single coil pickups and 500K for humbucker pickups

On the other hand, using 500K for single pickups gives your guitar Hi-Fi sound,

and using 250k for humbuckers gives your guitar a warmer sound than 500K.

Standard guitars use Liner pot for Volume and Audio taper pot for Tone control.

Audio taper pot changes level in proportion to how much you twist.

Liner pot changes radically 1 to 5 area, and changes little by little 6 to 10 area.
